

# aluminium box series CM010

This model of box is composed by a central part made of aluminium-estruded profile (series CA010), to which is possible to assemble different models of plugs (series TC010, TC020, TC030) and if needed the gaskets/washers (series KG020) too.

In this way it is possible to realize boxes which can satisfy your needs in terms of length and plug systems, and which are strong and cheap as well.

The central aluminium body (series CA010) length is between 5 and 30 cm. If you match the gaskets (series KG020) to the plugs (series TC010), it is possible to obtain a box with a high level of protection from water and dust.

Overall dimension are in millimeters. On demand detailed drawings will be provided.

# aluminium plug series TC020

The plugs are made of aluminium, there are no gaskets and they are available in two measures.

Each plug is provided of the 4 locking screws (2,9x13 mm).

The model TC020-B can be combined to the plug series TC030, as they have the same dimensions.

**Material:** aluminium

**Colori:** grey

**Packaging:** 20 pieces

Overall dimension are in millimeters. On demand detailed drawings will be provided.

# plug series TC030

This plug is realised in FR4 and holds the male lamellar connector series CL 30 poles. It has its own lock safekeeping and has no gaskets.

The dimensions are 108x48 as the aluminium plug TC020-B with which the TC030 is combined.

Each plug is provided with the 4 locking screws (2,9x13 mm).

**Material:** FR4

**Colour:** grey

**Packaging:** 20 pieces

Overall dimension are in millimeters. On demand detailed drawings will be provided.

# rubber gasket kit

## series KG010

The gasket kit is composed by 2 gaskets (they have to be used between the plug series TC010 and the aluminium body series CA010) and by 8 protection caps of the screws for the TC020 series.

This gaskets enable an high protection from water and dust. They are available in two models.

**Material:** silicone rubber

**Toughness:** 30 shore, 50 shore

**Packaging:** 20 pieces

KG010 -

- A white toughness 30 shore
- B black toughness 50 shore

Overall dimension are in millimeters. On demand detailed drawings will be provided.
